If found wandering aimlessly please return to:

Important Phone Numbers:

Always Remember:
A saveloy boiled is a saveloy spoiled

Apply double-sided tape or staple together or put a bit of chewing gum here:

Today I bring you an invention that's going to revolutionise the diary/organiser/laptop industry. People of the world I give you "King Andy's Handy Wrist Organiser".

From new-born babies to senior citizens - this organiser will suit everyone - and it has the added bonus of being "cool". Simply cut around the handy organiser, photocopy enough to last you an entire year, fill in the details for the day, attach to your wrist and you're away.

No more missing classes, no more being late for that important meeting, no more forgetting how to spell your name. It's all there on your wrist. You don't even have to type in a password to access it.

It's so lightweight you'll forget you're even wearing it - except when people stop you in the street and ask where they can get their very own wrist organiser because it's so very high-tech and cool.

Fashionable, organised, reliable, ultra-massively-cool - that's how people will describe you when you're wearing "King Andy's Handy Wrist Organiser".

But wait, there's more. To turn your wrist organiser into an "All-weather Mega-brilliant Organiser" simply wrap glad-wrap around it after filling in the details. Now that's better living everybody.

King Andy
